Patent No. US 7,658,213

## CHEMICALS

**BIO CLEAN (108)** is a synergistic blend of microbes and surfactants that work in two ways. First, **BIO CLEAN** goes to work immediately using surfactant technology to emulsify grease. Next, the enzymes provide long-term, deep cleaning by breaking down the grease and other organics that accumulate in porous floor surfaces. A new patent-pending microbial strain has been added to **BIO CLEAN** that attacks the most resistant grease deposits, it is partnered with a blend of strains selected for high rates of enzyme production.
