SAFETY DATA SHEET

1. Identification

Product identifier: Orthotolidine
Product code: R-0600
Recommended use: Use as directed by manufacturer for purposes directly related to water testing.
Recommended restrictions: None known

Manufacturer/Importer/Supplier/Distributor information

Manufacturer
Company name: Anderson Chemical Company
Address: 325 South Davis Avenue
Litchfield, MN 55355
United States
Telephone: (320) 693-2477
Website: www.acomm.com
E-mail: lmt@accomn.com
Emergency phone number: (800) 424-9300

2. Hazard(s) identification

Physical hazards: Corrosive to metals
Health hazards:
- Acute toxicity, oral: Category 4
- Carcinogenicity: Category 1B
- Eye damage/irritation: Category 1
- Skin corrosion/irritation: Category 1

Specific target organ toxicity, single exposure:
- Respiratory tract irritation: Category 3

Environmental hazards: Not currently regulated by OSHA; refer to section 12 of the SDS for additional information.

Label elements

Signal word: Danger
Hazard statement: May cause cancer. May be corrosive to metals. Harmful if swallowed. Causes severe skin burns and eye damage. May cause respiratory irritation.

Precautionary statement

Prevention: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not breathe mist or vapor. Use only outdoors or in a well-ventilated area. Wash skin thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection. Do not eat, drink or smoke when using this product. Keep only in original container.

Response: Absorb spillage to prevent material damage.
- IF EXPOSED OR CONCERNED: Get medical advice/attention.
- IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Call a physician or poison control center.
- IF ON SKIN (OR HAIR): Take off immediately all contaminated clothing. Rinse skin with water.
- Wash contaminated clothing before reuse.
- IF INHALED: Remove person to fresh air and keep comfortable for breathing.
Immediately call a physician or poison control center.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.

Immediately call a physician or poison control center.

**Storage**

Store in corrosive-resistant container with a corrosive-resistant liner. Store in a well-ventilated place. Keep container tightly closed. Store locked up.

**Disposal**

Dispose of contents/container in accordance with local/regional/national/international regulations.

**Hazard(s) not otherwise classified**

None

**Supplemental information**

None

### 4. First-aid measures

#### Inhalation

Move to fresh air. Give oxygen or artificial respiration if needed. Get medical attention immediately.

#### Skin contact

Immediately flush skin with running water for at least 20 minutes. Immediately take off all contaminated clothing. Call a physician or poison control center immediately. Chemical burns must be treated by a physician. Wash contaminated clothing before reuse.

#### Eye contact

Immediately flush eyes with plenty of water for at least 20 minutes. Remove contact lenses if present and easy to do. Continue rinsing. Call a physician or poison control center immediately.

#### Ingestion

Call a physician or poison control center immediately. Rinse mouth. Never give anything by mouth to a person who is unconscious or is having convulsions. Do NOT induce vomiting unless directed by physician. If vomiting occurs, keep head low so that stomach content does not get into the lungs.

#### Most important symptoms/effects, acute and delayed

Direct skin contact may cause severe irritation. Symptoms may include redness, edema, drying, defatting, and cracking of the skin. Direct contact with concentrated solutions may be harmful to the eyes and may cause severe damage including blindness. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Inhalation of mists can cause severe respiratory irritation. Symptoms may include coughing, choking, and wheezing.

Ingestion may produce burns to the lips, oral cavity, upper airway, esophagus, and possibly the digestive tract. Symptoms may include abdominal pain, vomiting, burns, perforations, bleeding.

Possible cancer hazard. May cause cancer, based on animal data.

#### Indication of immediate medical attention and special treatment needed

Provide general supportive measures and treat symptomatically. Immediate medical attention is required.

### 5. Firefighting measures

#### Suitable extinguishing media

#### Unsuitable extinguishing media

Do not use water jet as an extinguisher, as this will spread the fire.

#### Specific hazards arising from the chemical

During fire, gases hazardous to health may be formed.

#### Special protective equipment and precautions for firefighters

Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Firefighting equipment/instructions

Firefighters should wear full protective gear. Evacuate the area promptly. Fight fire from upwind to avoid exposure to combustion products. Cool containers/tanks with water spray. Do not get water inside container. Move containers from fire area if it can be done without risk. Prevent fire-extinguishing water from contaminating surface water or the ground water system.

Specific methods

Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards

Not combustible

Hazardous combustion products

Carbon oxides. Hydrogen chloride. Other irritating fumes and smoke.

6. Accidental release measures

Personal precautions, protective equipment, and emergency procedures

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Wear appropriate protective equipment and clothing during cleanup. Do not breathe mist or vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protective equipment, refer to section 8 of the SDS.

Methods and materials for containment and cleaning up

Large Spills: Ventilate the area. Stop leak if it can be done without risk. Use water spray to reduce vapors or divert vapor cloud drift. Dike the spilled material where this is possible. Stop leak if it can be done without risk. Absorb spillage to prevent material damage. Absorb in vermiculite, dry sand or earth, and place into containers. Prevent entry into waterways, sewer, basements, or confined areas. Following product recovery, flush area with water.

Small Spills: Absorb spillage with noncombustible, absorbent material. Clean surface thoroughly to remove residual contamination. Never return spills to original containers for reuse. For waste disposal, refer to section 13 of the SDS. Contaminated absorbent material may pose the same hazards as the spilled product. In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations.

Environmental precautions

Avoid discharge into drains, watercourses, or onto the ground.

7. Handling and storage

Precautions for safe handling

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Pregnant or breastfeeding women must not handle this product. Use only outdoors or in a well-ventilated area. Wear appropriate personal protective equipment. Do not breathe mist or vapor. Do not get in eyes, on skin, or on clothing. When using, do not eat, drink or smoke. Keep away from heat and other incompatibles. Avoid prolonged exposure. Wash skin thoroughly after handling. For personal protective equipment, refer to section 8 of the SDS. Observe good industrial hygiene practices. Label containers appropriately.

Conditions for safe storage, including any incompatibilities

Store locked up. Store in a cool, dry place out of direct sunlight. Store in original tightly closed container. Store in a well-ventilated place. Store away from incompatible materials (refer to section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

Biological limit values

No biological exposure limits noted for the ingredient(s)

Appropriate engineering controls

Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Eyewash facilities and emergency shower must be available when handling this product.
Individual protection measures, such as personal protective equipment

**Eye/face protection**
Wear safety glasses with side shields (or goggles) and a face shield. Provide an emergency eyewash fountain and quick-drench shower in the immediate work area.

**Skin protection**
- **Hand protection**
  Wear appropriate chemical-resistant gloves. Advice should be sought from glove suppliers.
- **Other**
  Wear appropriate chemical-resistant clothing.

**Respiratory protection**
In case of insufficient ventilation, wear suitable respiratory equipment. Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fumes at levels exceeding the exposure limits. Advice should be sought from respiratory protection suppliers.

**Thermal hazards**
When necessary, wear appropriate thermal protective clothing.

**General hygiene considerations**
Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking and/or smoking. Routinely wash work clothing and protective equipment to remove contamination.

10. Stability and reactivity

Reactivity
This product is stable and nonreactive under normal conditions of use, storage, and transport.

Chemical stability
Material is stable under normal conditions.

Possibility of hazardous reactions
No dangerous reaction known under conditions of normal use

Conditions to avoid

Incompatible materials

Hazardous decomposition products
Chlorine. Hydrogen chloride. For hazardous combustion products, refer to section 5 of the SDS.

11. Toxicological information

Information on likely routes of exposure

**Inhalation**
May cause respiratory irritation

**Skin contact**
Causes severe skin burns

**Eye contact**
Causes serious eye damage

**Ingestion**
Harmful if swallowed

Most important symptoms/effects, acute and delayed
Direct skin contact may cause severe irritation. Symptoms may include redness, edema, drying, defatting, and cracking of the skin. Direct contact with concentrated solutions may be harmful to the eyes and may cause severe damage including blindness. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Inhalation of mists can cause severe respiratory irritation. Symptoms may include coughing, choking, and wheezing.

Ingestion may produce burns to the lips, oral cavity, upper airway, esophagus, and possibly the digestive tract. Symptoms may include abdominal pain, vomiting, burns, perforations, bleeding.

Possible cancer hazard. May cause cancer, based on animal data.

**Oral**

**LD₅₀** Rat >89840 mg/kg

**Skin corrosion/irritation** Causes severe skin burns and eye damage

**Serious eye damage/eye irritation** Causes serious eye damage

**Respiratory sensitization** Not expected to be a respiratory sensitizer

**Skin sensitization** Not expected to be a skin sensitizer

**Germ cell mutagenicity** Not expected to be mutagenic

**Carcinogenicity** May cause cancer

*International Agency for Research on Cancer (IARC)* Overall Evaluation of Carcinogenicity

Orthotolidine (CAS 612-82-8) 2B Possibly carcinogenic to humans

Hydrochloric acid (CAS 7647-01-0) 3 Not classifiable as to carcinogenicity to humans

**Reproductive toxicity** This product is not expected to cause reproductive or developmental effects.

**Specific target organ toxicity, single exposure** Not classified as a specific target organ toxicity – single exposure

**Specific target organ toxicity, repeated exposure** Not classified as a specific target organ toxicity – repeated exposure

**Aspiration toxicity** Not expected to be an aspiration hazard

**Chronic effects** Frequent or prolonged overexposure may affect the kidneys and liver.

12. Ecological information

**Ecotoxicity** Very toxic to aquatic life

**Persistence and degradability** Not available

**Bioaccumulative potential** Not available

**Mobility in soil** Not available

**Other adverse effects** No other adverse environmental effects (e.g., ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

**Disposal instructions** Collect and reclaim or dispose of in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

**Local disposal regulations** Dispose of in accordance with all applicable regulations.

**Hazardous waste code** The waste code should be assigned in discussion with the user, the producer, and the waste disposal company.

**Waste from residues/unused products** Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (refer to Disposal instructions).
Contaminated packaging

Empty containers should be taken to an approved waste-handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container is emptied.
